WETOP: how to give staff access

Guide for the salon owner and manager. Screenshots come from a test salon; all names and emails are made up.

1. Who sees what: 4 access levels
2. New employee with access
3. Access for an existing employee
4. Invitation not opened: new link, resend, revoke
5. What the employee sees from the link
6. Safety
7. Quick checklist

Staff → Employees. The "WETOP access" column shows each person's level.

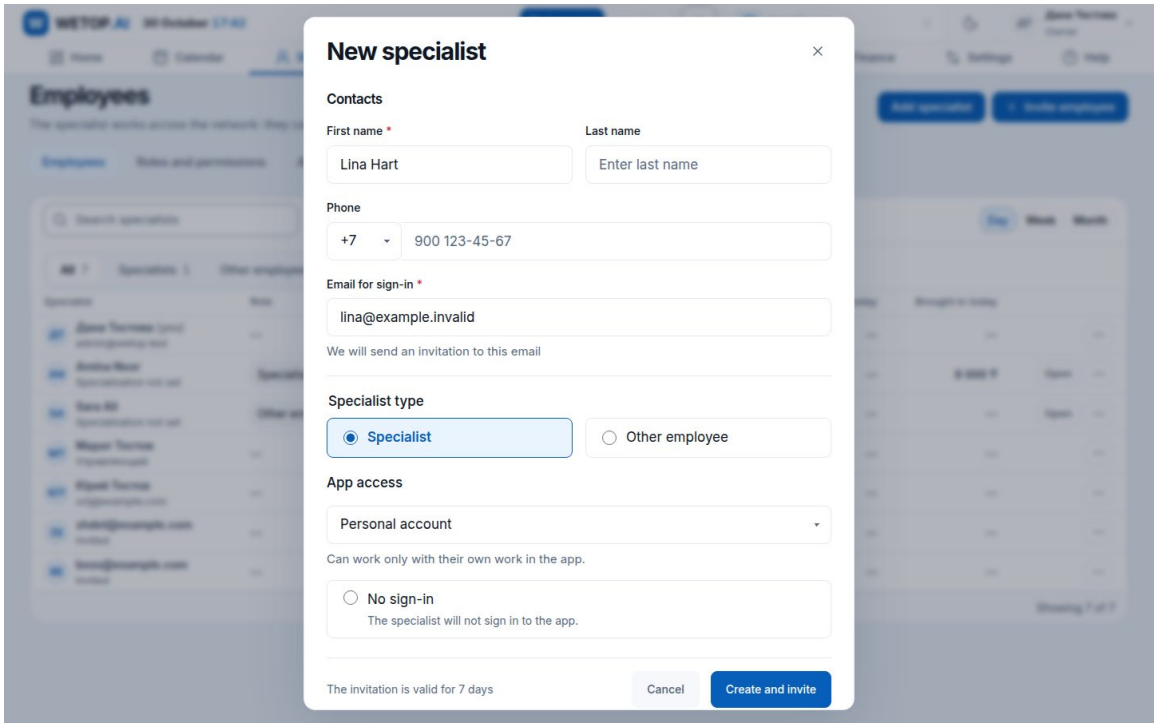

1. Who sees what: 4 access levels

Level	Who it is for	What they see
No sign-in	cleaner, helper	does not sign in, only a card in Staff
Personal account	specialist, waiter, maid	only their own: appointments, schedule, pay, reviews
Administrator	administrator, front desk	journal, clients, cash desk, daily work
Manager	branch manager	almost everything except owner areas. Only the owner can grant it

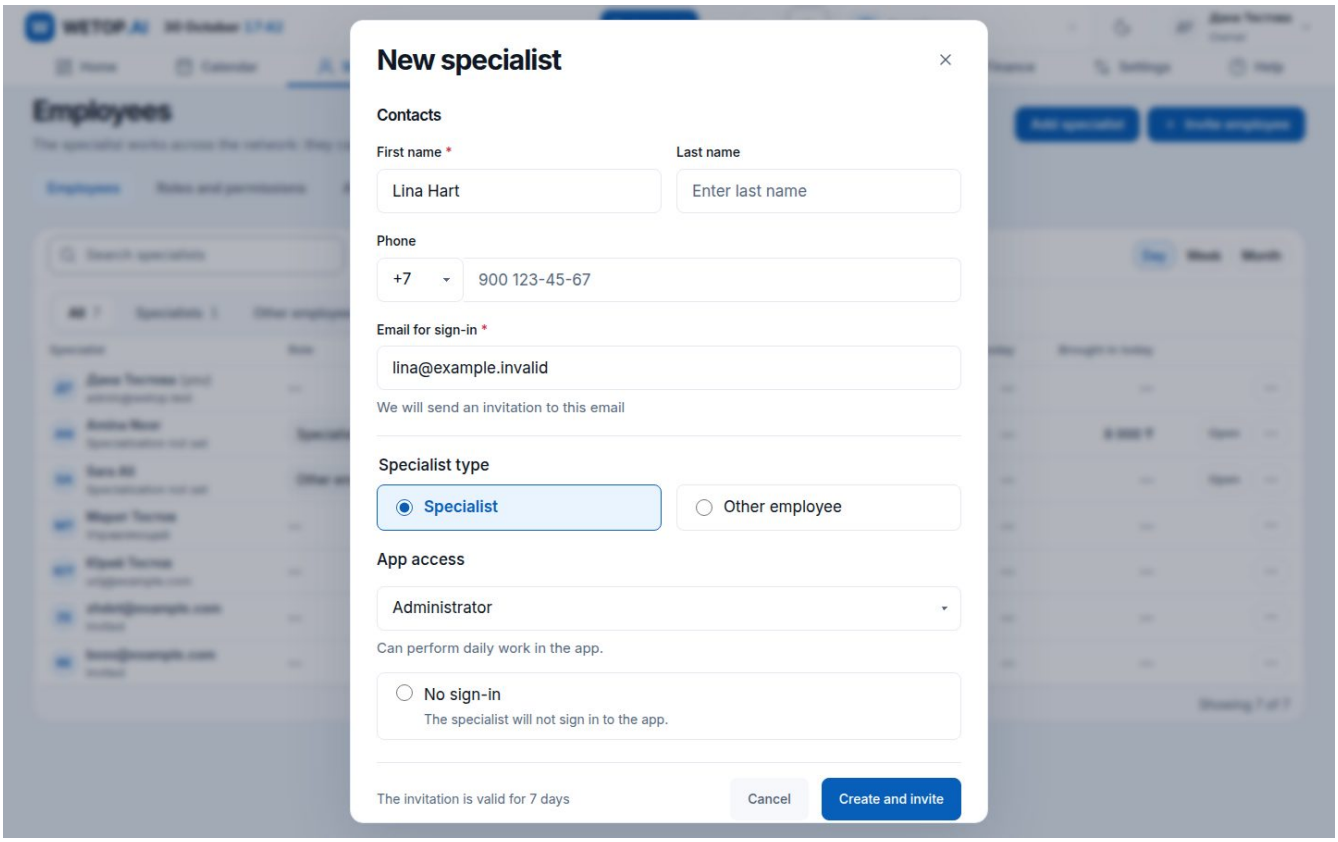

Tip: Only the Personal account can be shared by link or WhatsApp. Administrators and managers are invited by email only, because they handle cash and clients.

2. New employee with access

1. Open Staff → Employees and click "Add specialist".
2. Enter the name and sign-in email. Personal account is preselected for a specialist.
3. Click "Create and invite".

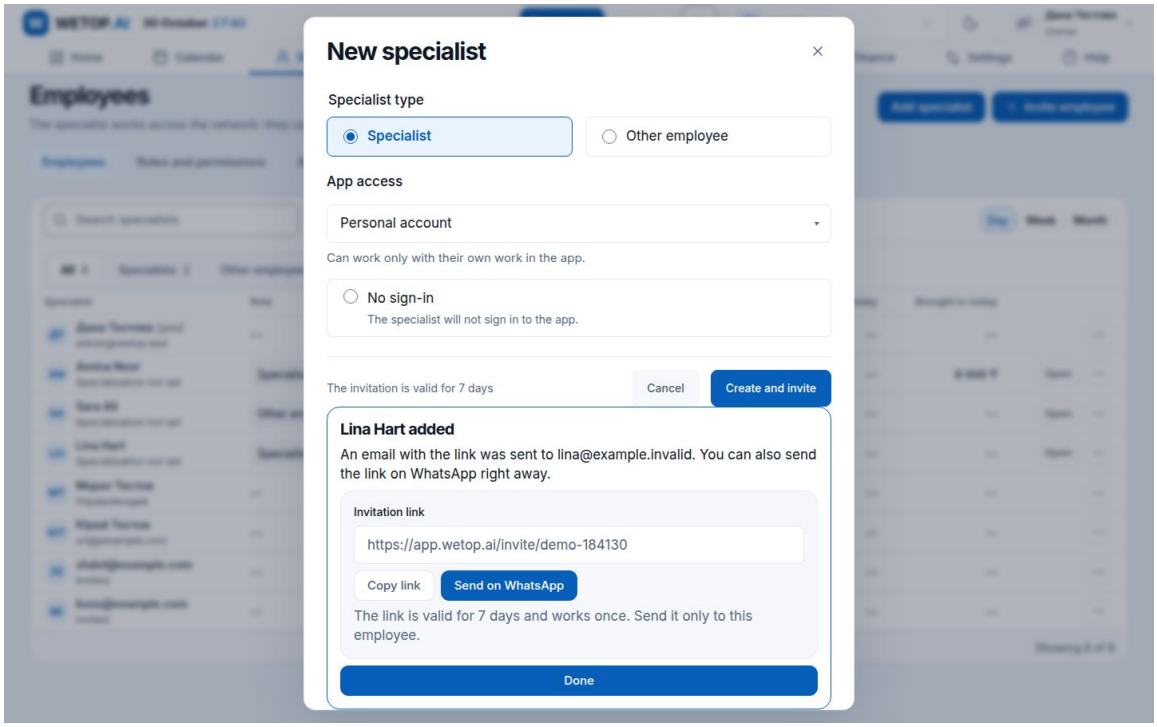

Personal account: the employee sees only their own appointments, schedule and pay.

If you pick Administrator, the line under the field says what they will be able to do.

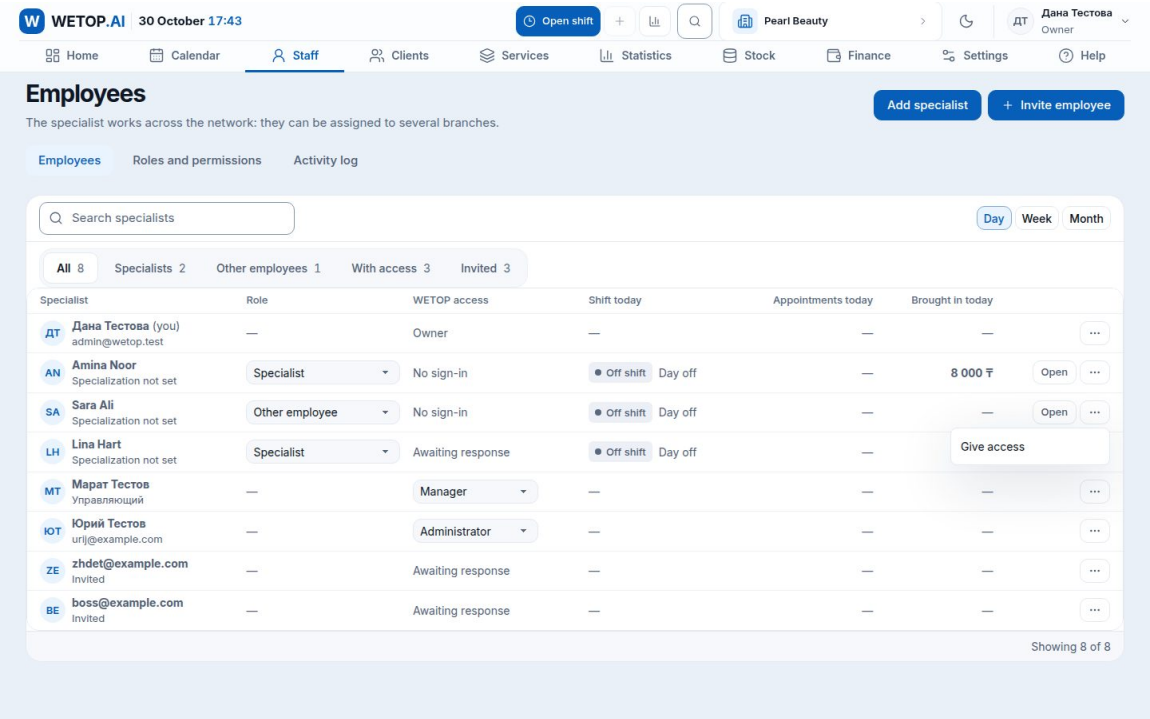

The link window

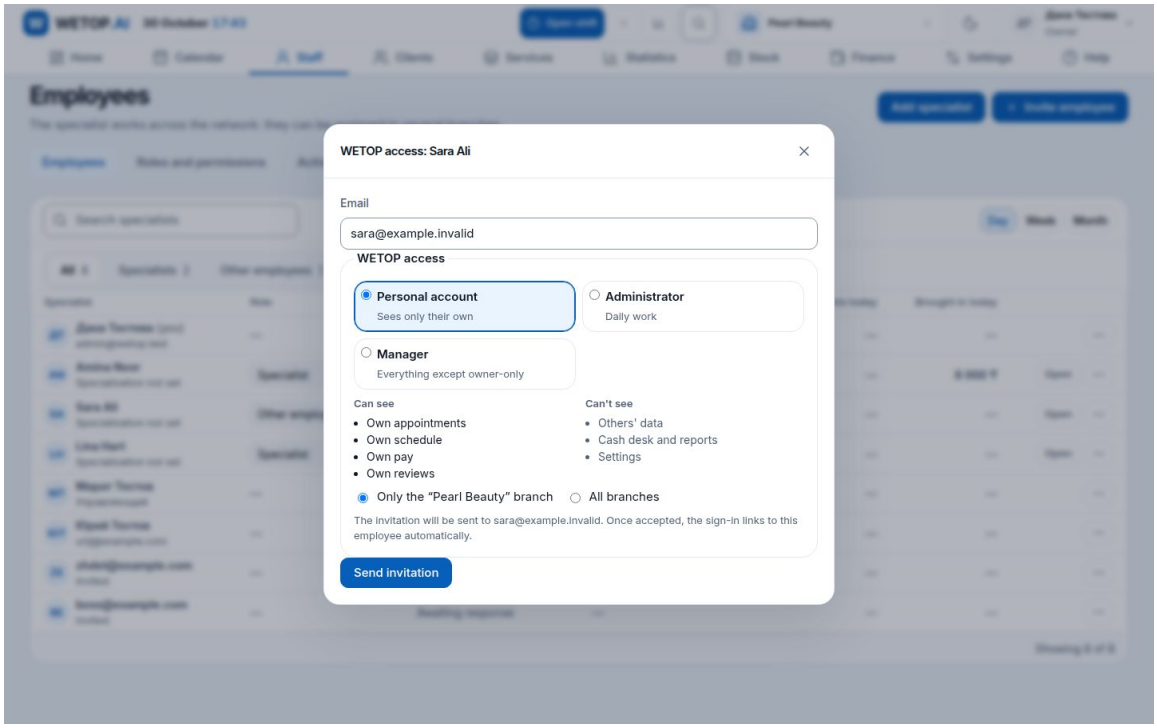

- The email with the link has already been sent.
- "Copy link": paste it into any messenger.
- "Send on WhatsApp": opens WhatsApp with a ready text to the phone from the card.
- "Done": closes the window and opens the employee card.

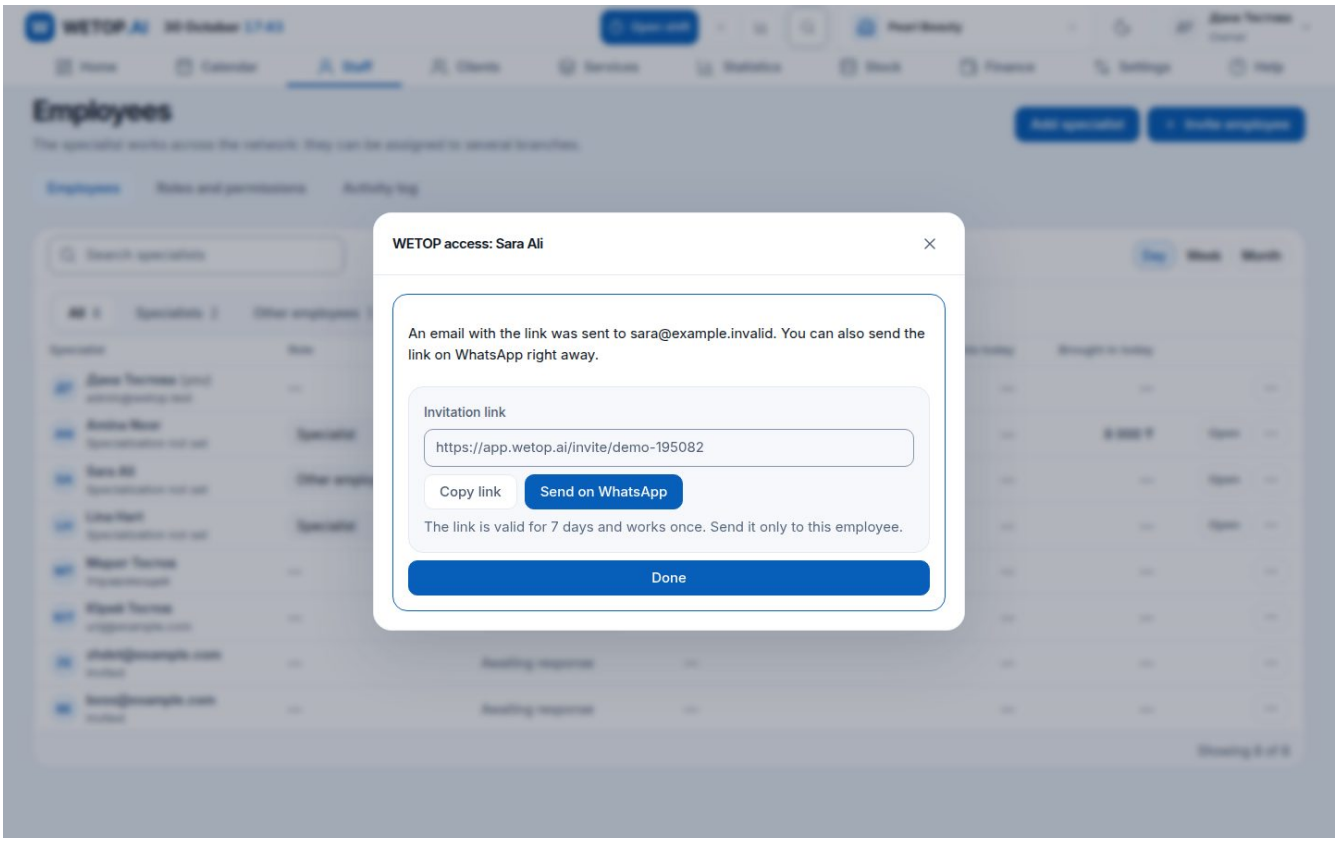

3. Access for an existing employee

1. In the row of an employee with no sign-in, click "⋯".
2. Choose "Give access".
3. Check the email and level, click "Send invitation".
4. The same link window opens. Click "Done".

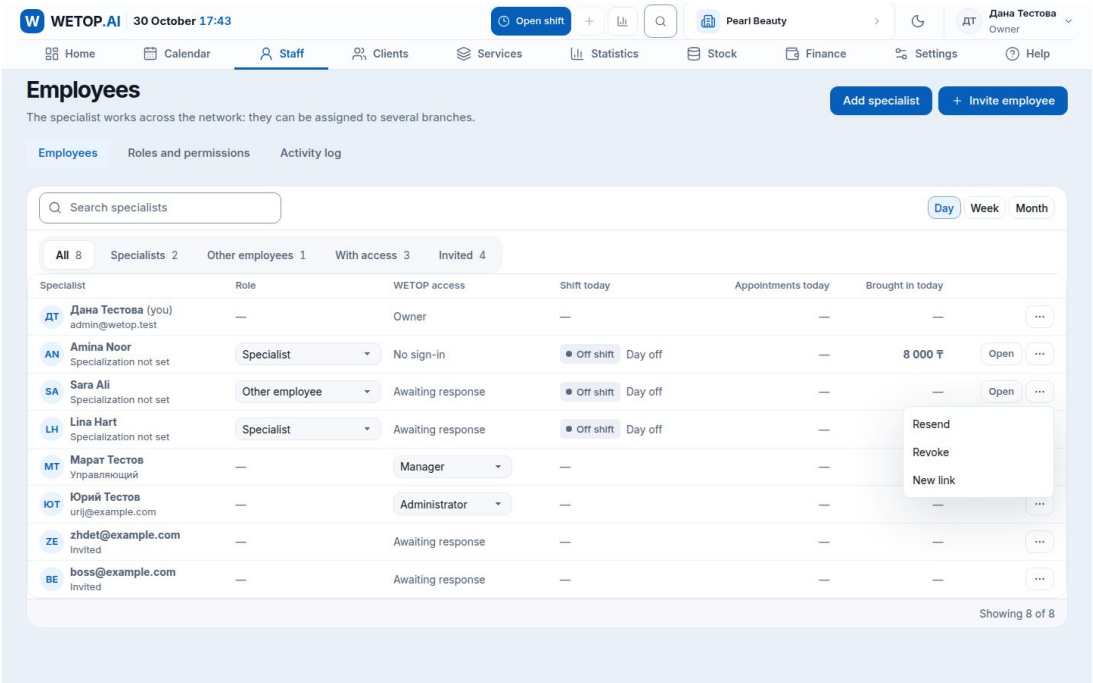

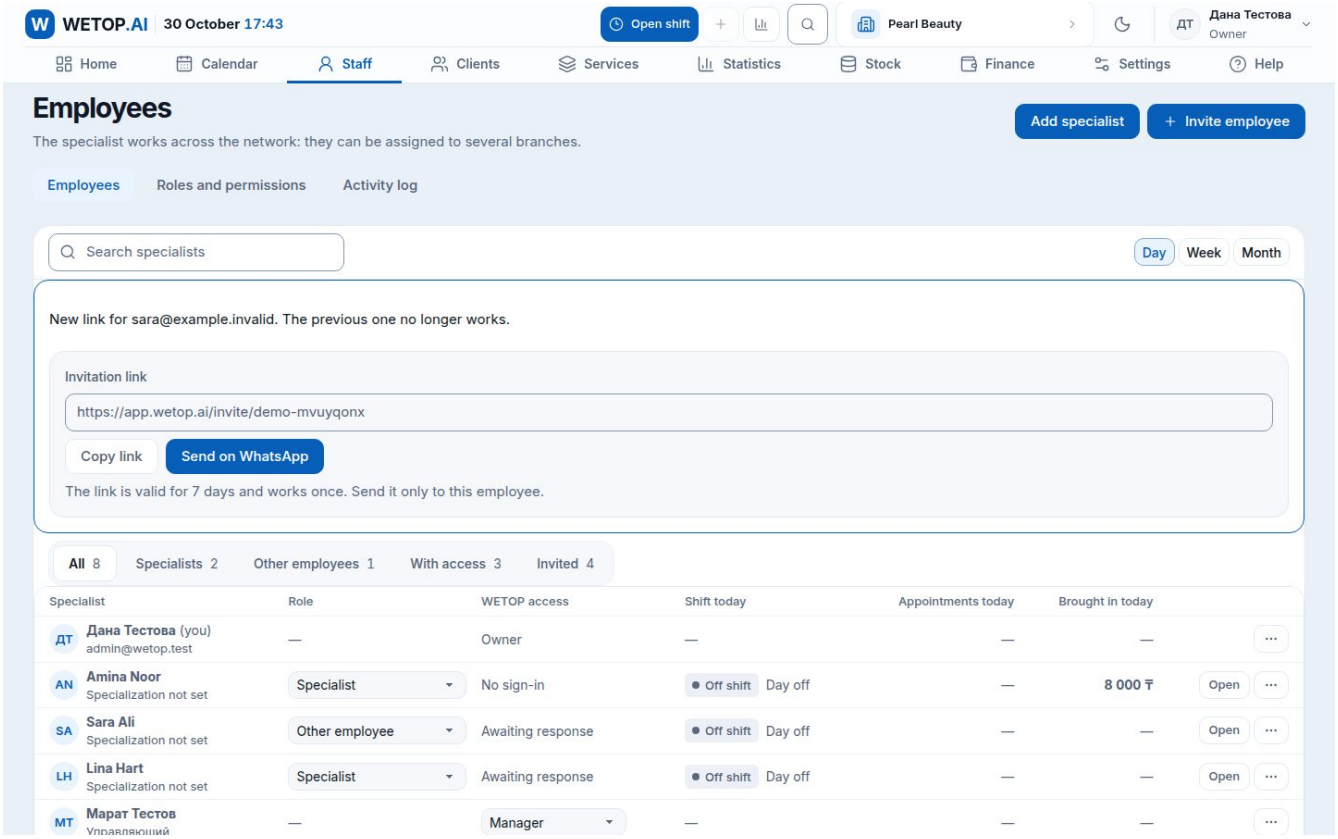

4. Invitation not opened

Until the employee accepts, the "WETOP access" column shows "Awaiting response". In the "⋯" menu of that row:

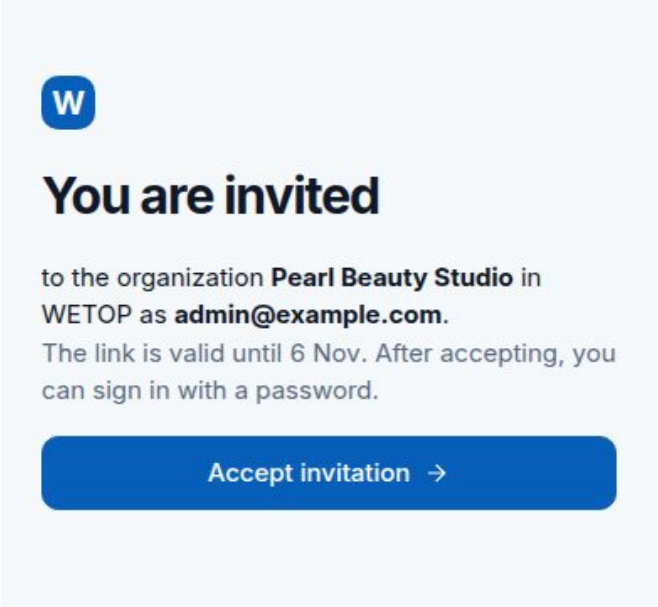

- "Resend": the same email again.
- "New link": a fresh link appears above the list, the old one stops working at once.
- "Revoke": the invitation is cancelled and the link no longer works.

5. What the employee sees from the link

1. Opens the link on the phone and taps "Accept invitation".
2. Sets a password, then signs in with email and that password.
3. A specialist lands in their Personal account, an administrator in the Journal.

The invitation link on a phone (test organization).

6. Safety

• The link is valid for 7 days and works once.

• Send it only to that employee.

• Every new link is recorded in the Activity history.

• When someone leaves, remove their access from the "⋯" menu; salon data stays.

7. Quick checklist

☐ Specialist: Personal account, email, "Create and invite", link on WhatsApp.

☐ Administrator: Administrator level, invitation by email.

☐ Only the owner appoints a manager.

☐ Not opened in 7 days: "⋯" → "New link".

☐ Someone left: remove access the same day.
